

Lab Goal : This lab was designed to teach you more about objects and the String class.

Lab Description : Take two words and output them as one word. You will need to concatenate the two original strings to make a new string. Concatenate means to add together. Output the length of the new string.

Sample Data :

```
hello world
jim bob
sally sue
computer science
VPA contests
```

Sample Output :

```
first :: hello
last :: world
sum :: hello world
length:: 11
```

```
first :: jim
last :: bob
sum :: jim bob
length:: 7
```

```
first :: sally
last :: sue
sum :: sally sue
length:: 9
```

```
first :: computer
last :: science
sum :: computer science
length:: 16
```

```
first :: VPA
last :: contests
sum :: VPA contests
length:: 12
```

//EXAMPLE STRING CODE

```
String one = "one";
String two = "two";
String three = one + two;
String four = two + one;
System.out.println(three.length());
```
