

Programming Challenge

Chapter 2

******* READ THESE INSTRUCTIONS *******

Write a program that **prompts the user for their name** and subsequently **welcomes them to the Tip Calculator**. Your program should ask the user to enter the **charge for their meal** and their **tip rate**. The **tax rate is 6.75%** of the meal charge. **The tip is calculated after adding the tax**. As output, **display the meal charge, tax amount, tip amount and total bill**.
