Writing Data to a File

Chapter 5

**************READ THESE INSTRUCTIONS*************

Review pages 283-289 in the text.

Write a program that prompts the user for a filename that must end in .txt and a list of colleges they are considering or have considered.

Your program should write the results to the file and close the file.

Validate results by running the program and having a classmate enter their responses.

Have your program and output file reviewed as classwork.
